If it is, then you need to create a new Smart Mounter that

can open packages in windows (I recommend using something like WinRAR). It also supports embedding images, PowerPoint presentations, and OneNote documents. The first version of Smart Mounter was developed in 2001, so it is quite old now. If you're running Windows 10 Enterprise edition (or Pro) and you've downloaded the December update, you will need to do some registry editing to make SharePoint features work. Whether you're a Mac or a PC user, we hope you have found this tutorial helpful and will continue to keep a close watch on the Windows 10 Insider program as more fun and useful features are added. Best of luck. When I try to import that database I get this message and the program crashes: Support: Contact the program's vendor for help. The program crashed while trying to view the properties of an object. The app does not need to load any dependencies, and the installer does not need to run any setup or activation scripts. If you get error messages when trying to install this program on your computer, see How do I repair a corrupted installation. Note: If you open a new Excel window while the Add-In is installed, you'll be prompted with a dialog box. This text will not appear in the final paper.
